Table 1. The Urban Region being Assessed

| The name of urban area in question: (That is, the name of the city, town, or municipality, etc., that is being assessed.) | Please fill in |
| Geographical spread of the urban area in km². | Please fill in |
| Population of the urban area. | Please fill in |
| Date or period of the assessment: Month(s), Year | Please fill in |
The ‘Circles of Sustainability’ profile process is intended as a way of developing an interpretative description of the sustainability of an urban region and its immediate hinterland. Here sustainability is understood in relation to local, national, and global processes: ecological, economic, political and cultural.

The profile template is intended as way of developing a more comprehensive understanding of an ‘urban region’—city, metropolis, town, municipality, village, etc. By responding to the questions in the Urban Profile Question it is possible to generate a clear and simple graphic representation of the sustainability profile of that region. Examples are shown in Figure 2 (below) for representative cities around the world.

*Figure 2. Circles of Sustainability Assessments*

Each of these figures represents a qualitative assessment by local and other experts of the sustainability of the respective urban areas.

The assessment group should define the precise nature of the urban area in question before the assessment begins (see Table 1 above). For example, in Figure 2 above ‘Sao Paulo’ refers to the greater Sao Paulo Metropolitan region. Similarly ‘Melbourne’ in this case is assessed across the metropolitan region of Melbourne rather than the Municipality of Melbourne, which is much smaller geographically and demographically.
The quality and standing of the assessment depends upon the expertise of the persons who are conducting the assessment. Optimally, we suggest that the assessment group should comprise three to ten people with different and complementary expertise about the urban area in question. Table 2 below is intended for recording the names and expertise of the persons on the Assessment Panel.

Table 2. Urban Profile Assessors on the Assessment Panel

<table>
<thead>
<tr>
<th>The profile mapping process can be done by different kinds of respondents. Different people have different knowledge sets, all of which can be valuable in making an urban assessment. In order to understand the nature of the assessment, we just need to know what kind of knowledge held by each respondent in the Assessment Panel.</th>
<th>Please indicate which kind of respondent(s) you are by adding names in the boxes below.</th>
</tr>
</thead>
</table>
| **1. Internal Expert Assessors**
That is, individuals who live in the urban region in question and have expert knowledge* of that region or a significant aspect of that region.

* Here ‘expert knowledge’ is defined as either being trained in some aspect of urban planning / administration, etc., or working in that capacity for some time. | Name | Position and/or Training |
| | | |
| **2. External Expert Assessors**
That is, individuals who do not live in the urban region in question, but have expert knowledge of that region or a significant aspect of that region. | Name | Position and/or Training |
| | | |
| **3. Lay Assessors**
That is, individuals who live in the urban region in question, and who have extensive local knowledge of the region or an aspect of the region, (without necessarily either being trained in urban planning, administration, or working in the field). | Name | Length of time having lived in the urban region |
| | | |
The Assessment Panel should meet for a sustained period to conduct the assessment. The amount of time taken depends upon the nature of the assessment. (See Table 3 below.) Two hours is optimal for a Rapid Assessment; four hours is minimal for an Aggregate Assessment, but a day would be better. It might, however, take significantly longer for an Annotated Assessment. And a comprehensive assessment would take from a few months to a year depending upon how much dedicated time is given to it. Ideally, individuals on the panel should read through the questions before meeting as a panel and where necessary seek information about issues with which they are not familiar.

Table 3. The Nature of the Assessment Process

<table>
<thead>
<tr>
<th>The profile mapping process can be done at four levels:</th>
<th>Please indicate which profile exercise you intend to complete by ticking the box or boxes.</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Rapid Assessment Profile</td>
<td>☐ and/or</td>
</tr>
<tr>
<td>Responding to the single ‘general question’ under each</td>
<td></td>
</tr>
<tr>
<td>‘perspective’ by marking the 9-point scale.</td>
<td></td>
</tr>
<tr>
<td>2. Aggregate Assessment Profile</td>
<td>☐ and/or</td>
</tr>
<tr>
<td>Responding to the ‘particular questions’ under each ‘perspective’</td>
<td></td>
</tr>
<tr>
<td>by marking the 9-point scale).</td>
<td></td>
</tr>
<tr>
<td>3. Annotated Assessment Profile</td>
<td>☐ and/or</td>
</tr>
<tr>
<td>Completing the exercise at Level 2 and writing detailed annotations about how the points on the scale were derived.</td>
<td></td>
</tr>
<tr>
<td>4. Comprehensive Assessment Profile, I</td>
<td>☐ and/or</td>
</tr>
<tr>
<td>Completing the exercise at Level 3 and writing a major essay on the urban area using the questions to guide the writing.</td>
<td></td>
</tr>
<tr>
<td>and/or</td>
<td></td>
</tr>
<tr>
<td>Comprehensive Assessment Profile, II</td>
<td>☐ and/or</td>
</tr>
<tr>
<td>Completing the exercise at Level 3 and assigning metrics-based indicators to each point on the scale.</td>
<td></td>
</tr>
</tbody>
</table>

If you are conducting a Rapid Assessment only the General Question in each set needs to be answered. That question works as a proxy question for that whole area of sustainability.

If you are conducting an Aggregate Assessment at least six of the questions in each set of seven questions need to be answered. If one of the questions in each set is deemed to be particularly inappropriate for your urban area, you can either choose to replace that one question by alternative question that you formulate for yourself or choose not to answer that question and leave the assessment blank.

In most cases, the questions will be weighted equally in finalizing the assessment—that is, unless a prior round of assessment is done to rank-and-weight the questions in each perspective in relation to each other.

Definitions for the Purposes of this Questionnaire

- ‘Urban area’ or ‘area’ means the area that you have defined as the basis for making this assessment. The concept of ‘local’ is used to mean within the urban area.
- ‘Urban region’ means the urban area and its immediate hinterlands, including its peri-urban extensions, adjacent agricultural and rural land, and its water catchment areas if they are in the vicinity of the urban area.
- ‘Broader region’ is taken to mean within two-three hour’s land transport.
• Concepts such as ‘good’ and ‘appropriate’ are to be defined in terms of the values of the sustainability assessment respondents, but in an Annotated Assessment these are the sorts of issues that would need to be defined by the Assessment Panel.

**The Scale for Critical Judgement**

The questionnaire asks for critical judgement on a nine-point scale of sustainability from critical sustainability to vibrant sustainability. *Critical sustainability* means a level of sustainability that requires critical or urgent change in order to be assured of continuing viability. *Vibrant sustainability* means a level of sustainability that is currently active in reproducing vibrant social and environmental conditions for long-term positive viability. The mid-point, *satisfactory sustainability*, signifies a level of sustainability that allows for a basic equilibrium over the coming period. See Table 4 below.

**Table 4. The Scale of Sustainability**

</tr>
</tbody>
</table>

**The Issues in Contention**

The Urban Profile process works on the basis of a four-domain model (see Appendix 1 for a discussion on the basis of the model). Each domain is divided into seven perspectives (as set out in Table 5 below), and seven questions are asked about each perspective (see the questionnaire beginning on the next page).

**Table 5. Summary of the Structure of the Urban Profile Process**

<table>

<td>Satisfactory</td>
<td>Satisfactory+</td>
<td>Highly Satisfactory</td>
<td>Good</td>
<td>Vibrant</td>
</tr>
</tbody>
</table>

*Particular Questions*

*How sustainable are the following aspects of the urban area?*

1. The availability of material resources in the broader region.\(^1\)
2. The availability of food grown in the immediate urban region.\(^2\)
3. The availability of minerals and metals sourced from the broader region.
4. The proportion of electricity produced for the urban area by renewable means.
5. The dependence of the urban area on fossil fuels.
7. The translation of resource-use monitoring into reduction strategies.

*Optional alternative questions:*

2. Water and Air

*General Question*

*How sustainable are the levels of air quality and water quality in the urban environment?*

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>

<td>Satisfactory</td>
<td>Satisfactory+</td>
<td>Highly Satisfactory</td>
<td>Good</td>
<td>Vibrant</td>
</tr>
</tbody>
</table>

*Particular Questions*

*How sustainable are the following aspects of the urban area?*

1. The bodies of water in the urban region.
2. The ready access of all to potable water distributed with minimum energy-use.
3. The continuous presence of good quality air in the urban region.
4. The liveability of the urban region’s climate.
5. The carbon footprint of the urban area.
6. The development of climate-change adaptation strategies for the urban area.
7. The translation of air-and-water quality in the area monitoring into quality-improvement strategies.

*Optional alternative question:*

---

\(^1\) Remember here that ‘broader region’ here means within two-three hours land-transport. ‘Material resources’ includes all resources from water and energy to concrete and steel.

\(^2\) Remember here that ‘urban region’ means the urban area and its immediate hinterlands.
3. Flora and Fauna

*General Question:* To what extent is biodiversity sustainable across the urban region?

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
<th>8</th>
<th>9</th>

<tr>
<td>Critical</td>
<td>Bad</td>
<td>Highly Unsatisfactory</td>
<td>Satisfactory</td>
<td>Satisfactory</td>
<td>Satisfactory+</td>
<td>Highly Satisfactory</td>
<td>Good</td>
<td>Vibrant</td>
</tr>
</tbody>
</table>

**Particular Questions**

*How sustainable are the following aspects of the urban region?*

1. The resilience of regional eco-systems to past and present urbanization.
2. The biodiversity of the region now by comparison with the time of its first major settlement.
3. The rate of native plant species’ extinction in the urban region across the last hundred years.
4. The tree coverage of the urban region—native or otherwise.
5. The continuing viability of native species of birds and animals in the urban region.
6. The relation of people in the urban region to non-domesticated animals and birds.
7. The translation of monitoring of flora and fauna into sustainability-improvement strategies.

*Optional alternative question:*

4. Habitat and Settlements

*General Question:* How well does the urban area relate ecologically to the landscape on which it is built?

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
<th>8</th>
<th>9</th>

<td>Bad</td>
<td>Highly Unsatisfactory</td>
<td>Satisfactory</td>
<td>Satisfactory</td>
<td>Satisfactory+</td>
<td>Highly Satisfactory</td>
<td>Good</td>
<td>Vibrant</td>
</tr>
</tbody>
</table>

**Particular Questions**

*How sustainable are the following aspects of the urban region?*

1. The human liveability of the regional topography.
2. The extent of original habitat still viable in the urban region.
3. The existence of natural spaces—either original habitat or parks and gardens—as integral and accessible to all local neighbourhoods.\(^3\)
4. The limiting of building in areas prone to natural risks such as flooding and landslides.
5. The use of appropriate materials in buildings.\(^4\)
6. The retrofitting of buildings and infrastructure to respond to environmental issues.
7. The translation of habitat monitoring in the urban area into robust conservation strategies.

*Optional alternative question:*

---

\(^3\) Here ‘natural spaces’ means vegetated spaces—either original habitat or created natural settings such as parks.

\(^4\) Here ‘appropriate materials’ might be taken to mean such things as materials that appropriate to the climate or materials that are recycled, locally sourced, or sustainably produced.
5. Built-Form and Transport

**General Question:** Does the form of the urban area and its transport system support sustainable living?

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>

<td>Satisfactory</td>
<td>Satisfactory</td>
<td>Satisfactory+</td>
<td>Highly Satisfactory</td>
<td>Good</td>
<td>Vibrant</td>
</tr>
</tbody>
</table>

**Particular Questions:**

*How sustainable are the following aspects of the urban area?*

1. The spread of the urban area—with particular concern in relation to urban sprawl.
2. The access of people to the different social amenities across the urban area through overlapping transport modes.
3. The accessibility of mass transit systems in the urban area—particularly as extending to the urban fringes and non-formal zones.  
4. The degree of dependence on cars.
5. The level of support for using non-motorized transport such as bicycles and walking through provision of safe walking paths, protected bike-lane networks, low-speed residential zones, etc.
6. The implementation of energy-use reduction practices for air and sea transport.
7. The translation of transport monitoring into quality-improvement strategies.

• **Optional alternative question:**

6. Embodiment and Food

**General Question:** How sustainable is the health of people in relation to how they physically live in the urban area?

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>

<td>Satisfactory</td>
<td>Satisfactory+</td>
<td>Highly Satisfactory</td>
<td>Good</td>
<td>Vibrant</td>
</tr>
</tbody>
</table>

**Particular Questions**

*How sustainable are the following aspects of the urban area?*

1. The general physical health of residents.
2. The rate of infant mortality in the urban area.
3. The level of physical exercise enacted regularly by all people in the urban area.
4. The hygiene of urban streets for all people.
5. The nutrition of food generally eaten by residents.
6. The level of urban agriculture in the urban area, including in people’s home sites.
7. The translation of physical health monitoring into quality-improvement strategies.

• **Optional alternative question:**

---

5 Here 'mass transit systems' should be taken to include both public and private transport systems such rail and bus networks.
7. Emission and Waste

General Question: How sustainable is the way that the urban area deals with emissions and waste?

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>

</tbody>
</table>

**Particular Questions**

*How sustainable are the following aspects of the urban area?*

1. The level of carbon emissions in the urban area.
2. The amount of hard waste produced by the urban area.
3. The treatment of sewerage, including the subsequent dispersal of the treated products.
4. The storm-water drainage system in the urban area.
5. The composting of household green and vegetable waste.
6. The level of hard-waste recycling in the urban area.

*Optional alternative question:*

---

**Economics**

1. Production and Resourcing

General Question: How sustainable are the broad patterns of production and resource-access in the urban area?

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>

</tr>
</tbody>
</table>

**Particular Questions**

*How sustainable are the following aspects of the urban area?*

1. The general prosperity of the urban area.
2. The local manufacturing base of the urban area for producing basic goods.
3. The access in the urban area to necessary primary resources.
4. The arts communities in the urban area.\(^6\)
5. The level of design expertise in the urban area.\(^7\)
6. The labour resources of the urban area.\(^8\)
7. The translation of economic monitoring into quality-improvement strategies.

*Optional alternative question:*

---

\(^6\) ‘Arts communities’ might be taken to include different artists from musicians and painters to craft workers.

\(^7\) ‘Design expertise’ might be taken to include architects and planners to graphic designers and jewelry designers, etc.

\(^8\) ‘Labour’ includes both manual and intellectual labour resources from artisans and physical workers to doctors and engineers.
2. Exchange and Transfer

General Question: How sustainable is the current movement of money, goods and services into and through the urban area?

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>

</tbody>
</table>

Particular Questions

How sustainable are the following aspects of the urban area?

1. The opportunity to participate in ethical trade—for example, locally through community gardens and produce-markets, or globally through fair-trade networks.
2. The availability of basic goods, including through non-commercial and low-cost outlets.
3. The fair redistribution of financial resources through processes such as the tax system.
4. The resilience of external trade relations, including through bilateral exchange agreements between cities.
5. The provision of material aid and social support to people in need beyond the immediate urban area.
6. The levels of debt carried by different sectors of the urban area—both public and private.
7. The translation of financial monitoring into quality-improvement strategies.

• Optional additional question:

3. Accounting and Regulation

General Question: How robust are the various accounting and regulatory frameworks in the urban area?

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>

</tr>
</tbody>
</table>

Particular Questions

How sustainable are the following aspects of the urban area?

1. The transparency of public spending.
2. The robustness of financial auditing systems that apply in the urban area.\(^9\)
3. The appropriateness of regulation of goods and services.\(^10\)
4. The application of consistent land-use regulation.
5. The appropriate regulation of financial systems that affect the urban area.
6. The appropriate regulation of labour practices, including health-and-safety considerations.
7. The translation of the monitoring of regulatory systems into quality-improvement strategies.

• Optional alternative question:

\(^9\) Here consideration of the question should take in both public and private auditing systems.

\(^10\) Here, as elsewhere, the question of ‘appropriateness’ should be judged in relation to general public outcomes, including the poor or vulnerable, rather than outcomes pertaining to any one sectional interest.
4. Consumption and Use

*General Question:* How sustainable are the current consumption patterns of the urban area?

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>

**Particular Questions**

*How sustainable are the following aspects of the urban area?*

1. The re-use of goods, including through personal exchange and second-hand outlets.
2. The development of responses to food security and vulnerability to seasonal shortages of food.
3. The ongoing availability to all of goods and services deemed necessary for good living.
4. The ongoing availability to all of basic utilities—such as water, electricity, and gas.
5. The capacity of local people to respond to peak-oil issues, including rising costs.
6. The accuracy of advertising circulated locally in providing information about consumption goods.
7. The translation of the monitoring of consumption patterns into strategies for enhancing good production and good use.

*Optional alternative question:*

5. Labour and Welfare

*General Question:* How sustainable are the conditions of work across the urban area?

<table>
<thead>
<tr>
<th>1</th>

</tbody>
</table>

**Particular Questions**

*How sustainable are the following aspects of the urban area?*

1. The range of livelihoods available in the area to those with appropriate skills.
2. The possibility for all of meaningful productive vocations.
3. The relative equity of access to secure employment in the area across differences of gender, age and ethnicity.
4. The capacity of the labour force to work productively.
5. The safety of workers.
6. The comprehensiveness of general welfare support processes across the urban area.
7. The translation of the monitoring of labour practices into strategies for enhancing the comprehensiveness of good working conditions.

*Optional alternative question:*

---

11 *Welfare* is broadly defined here to include, on the one hand, social security, pensions, and in-kind state support to individuals or families, and, on the other hand, support that comes from social networks, philanthropy and personal relations.
6. Technology and Infrastructure

General Question: To what extent is basic infrastructure in urban area appropriate and supportive of a broad cross-section of needs?

<table>
<thead>
<tr>

Particular Questions

How sustainable are the following aspects of the urban area?

1. The appropriateness of technologies and public infrastructure used to support the ongoing development of the urban area.
2. The robustness of information storage systems available to people in the urban area.
3. The adoption of new technologies in transport such as hybrid vehicles and intelligent transport systems.
4. The quality of the building stock, both commercial and housing, in the urban area?
5. The resourcing of the education system with appropriate technologies and infrastructure readily available to locals.
6. The resourcing of the health system with appropriate technologies and infrastructure readily available to locals.
7. The translation of the monitoring of technological use into strategies for enhancing positive technological application.

Optional alternative question:

7. Wealth and Distribution

General Question: Is the wealth of the urban area sustainable; and is it distributed in way that benefits all?

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>

</tr>
</tbody>
</table>

Particular Questions

How sustainable are the following aspects of the urban area?

1. The public use of wealth of the urban area for maximum social benefit for all.
2. The maintenance of the inherited social wealth of the urban area—for example, the maintenance of heritage buildings or public spaces for maximum social benefit.
3. The relative equity of wage levels for different groups—as categorized by job, but also across difference of gender, age and ethnicity, etc.
4. The affordability of local housing for all.
5. The relative equity of accumulated wealth of the residents of the urban area.
6. The effectiveness of processes for redistributing wealth in the urban area.
7. The translation of the monitoring of wealth accumulation into strategies for enhancing the social benefits for all.

Optional alternative question:
Politics

1. Organization and Governance

General Question: How well does the current system of governance function to maximize benefits for all?12

<table>

Particular Questions

How sustainable are the following aspects of the urban area?

1. The political legitimacy of the various levels of government relevant to the urban area.
2. The capacity of the leaders of the various kinds of governance relevant to the urban area.
3. The visions projected by the relevant levels of government for positively managing the form of the urban region—for example, in relation to managing urban growth.
4. The capacity of the administrative staff in the various levels of bureaucracy.
5. The authority of the various levels of governance to carry out policy.
6. The transparency of decision-making processes.
7. The translation of the monitoring of administrative practices into strategies for enhancing the quality of governance.

• Optional alternative question:

2. Law and Justice

General Question: How well does the dominant legal system work?13
